

# THE NORTHERN TRIBUNE

AN INDEPENDENT WEEKLY  
Published every Thursday at Grande Prairie, Alberta.

The Tribune's aim is to thoroughly "cover" the local news field with fairness to all sections and parties, and to aid in the development of the Peace River Country and help make known this northern inland empire's many advantages as a home-land. All news is printed without intentional distortion. The paper's opinions are expressed only in the editorial columns. Letters for publication are well come. A pen name may be used, but correspondents must also sign their proper names. Not necessarily for publication, but as evidence of good faith. In publishing a communication, the Tribune does not imply agreement. Legal and other advertising rates furnished on application.

Subscription Rates:

## Along the Trail

By J. B. YULE

AND SOME PEOPLE SAY THAT  
ANIMALS DON'T REASON

This little experience which the writer had at the time of the outbreak of the epidemic could be considered rather belated as news. However, it is not being printed from that angle.

I was standing close to the chute during the final ride in the provincial trunk buckaroo contest when a grey horse, the name of which I forgot, ridden by Pat Langlois, of the chute opened. The horse refused to go out when they did get him out to beat back into the chute twice. Finally he got going, but not in the open. Instead he followed close to the corral fence and ran down a narrow passage in which I and others were standing and out through a small gate. It was surprising how quickly a person can move in the face of danger coming at a breakneck speed and out on going places. Those of us who were practically trapped in the narrow passage managed to clear up and get out. Now the point was that the horse, second before the grey steed passed by. That the horse had his plan of action figured out to a nicety. No five-year plan had anything to do with this horse's calculation, for he started out to do something and he did it without a hitch. So far as the rider is concerned it was a case of "whither the horse goeth I go too."

If it is the writer's opinion that animals reason more than the average person thinks.

I know a dog in Grande Prairie, which when it owner takes the train meets all trains, including freight, until the owner comes home.

I have heard many true stories of the remarkable intelligence of all types of animals, especially horses and dogs. I once owned a St. Bernard dog which if intelligence could be enjoyed in himself in the happy hunting grounds. His name was Hap, meaning strength.

## OBJECTS TO ULTRA-VIOLET SITTING ON THE BENCH

In this column The Tribune last week carried a story about a man in Grande Prairie suggesting that Ultra Viole should be banished from the country as an undesirable. The same man since then rushed into a room where the same party referred to were discussing things in general.

"Are we going to stand for this?" he asked.

"For what?" queried one of the party.

"I have just been told that this guy Ultra Viole is going to sit with the judges when Albert's boys are to be tried. Not only that, but they tell me that it is going to tell the judges what to do."

"I ask you, how long are we Canadians going to stand for this bullying?" continued the heated man. "I am in favor of starting to organize right now to drive this guy back to Europe, Asia, or wherever he came from."

The party agreed that his point was well taken and he could depend upon one hundred per cent support from them.

After observing that no time should be lost, the man rushed out of the room to begin his campaign.

## RESOLUTION AVOIDING A SAFETY VALVE

The other day I was reading a story about the famous Hyde Park in London.

With the background of a thousand years the people of England have inherited many things, and one of these is that if freedom of speech is denied the lid is liable to be blown off.

Realizing this danger, the various governing bodies have set aside isolated spots where those who are dissatisfied with conditions must be allowed to express their views through the speech-making route.

The writer during his travelling around has seen many of these spots in the large cities in the New World. I noticed that when the various speakers had finished their speeches they seemed to be just as satisfied as if they had presented a successful revolution. They got the whole thing out of their system and they went away to prepare another trade to be delivered later.

Now in the small towns and rural districts, as a rule, there are no forums, but it should be understood that there are other avenues of escape, the principal one being the resolution route.

The writer during the last ten years at Grande Prairie has published enough resolutions passed by the various conventions to have the highway filled by officials in the various departments of government. With few exceptions there has never been any emergency follow up and in a year's time the majority attending the convention have forgotten that such resolutions were passed.

But it is not to discuss this phase of the question that this little story of "Along the Trail" is being written, but rather to emphasize the importance of the resolution avenue as a means of preventing what might be a dangerous explosion.

I have seen at conventions one man present as high as half a dozen resolutions, and he is down on his knees

of which he was a member and some of the product of his own brain. Of course, these resolutions have to be spoken to and the mover then has plenty of opportunity to occupy a very prominent and enviable position in the convention. Briefly, it is very much in the spotlight area, like the fellow on the soap box, he receives the convention hall just as well placed as if he had in one fell swoop dislodged the powers that be and placed the proletariat in the saddle of government.

If the various governments are wise in their day and generation and wish to avoid trouble, they will never put any obstacles in the resolution avenue.

## IN THE TRIBUNE'S MAIL BOX

### A LIBERAL MEETING

Far be it from me to antagonize my many Liberal friends; nevertheless, it is by discussion or debate that we get the facts most accurately. If we can view the mountain of truth from all sides, instead of from one standpoint only, we can better comprehend the situation, the grandeur and the majesty thereof. We may try to be fair as humanly possible and yet one-sided view creep in.

Hon. J. G. Gardiner, the Liberal Minister of Agriculture, gave his audience a most interesting and useful talk during which the Liberals were in power in the Dominion province kept right on increasing it. We were put out. Farmers' minds are filled with farming, politics, and history, but nevertheless, it is able to recall the fact that the bottom fell out of the Liberal government in 1926, and the Liberals were still in office till they were still in office till they could not get us the bare cost of production.

In the last great depression manufactured products on the world's markets fell as fast and as far as agricultural products. If we could have "traded" our 20-cent wheat to Japan and got bicycles for \$250 each, a fountain pen for 7½ cents, a pair of socks for five cents or a complete outfit of clothing for \$250. If we could have "traded" during the depression our five-year plan and anything on the horse's calculation, for he started out to do something and he did it without a hitch. So far as the rider is concerned it was a case of "whither the horse goeth I go too."

If it is the writer's opinion that animals reason more than the average person thinks.

I know a dog in Grande Prairie, which when it owner takes the train meets all trains, including freight, until the owner comes home.

I have heard many true stories of the remarkable intelligence of all types of animals, especially horses and dogs. I once owned a St. Bernard dog which if intelligence could be enjoyed in himself in the happy hunting grounds. His name was Hap, meaning strength.

# Cutting of Trail Through Monkman Pass Shows Self Help Not Yet Dead DAD'S NOTIONS

By E. S. STANLEY

He who joins the SELF-HELP band and helps to win the SELF-HELP game. Shall certainly share in the SELF-HELP fame.

The virtue of SELF-HELP is not yet wholly dead, as shown by the Monkman Pass Highway. In the project they have undertaken.

After almost a generation of fruitless pleading with governments to provide them a coast outlet, a handful of men have met the situation by proceeding to do it themselves.

With the donation of their own time, with contributions from interested people, and with providing for the needs of farmers, the first of building a preliminary vehicular trail through the pass is progressing as only men imbued with an unwavering purpose could effect. More than 40 of the 132 miles required are already completed.

A generation hence these men and those lending assistance will be esteemed as heroes—richly so. Our governments are equally rich in thousands of men in idleness as though there were no work that they might do. But not the slightest of encouragement or help—not even modest aid to get the men to have set themselves to a task more fitting for a nation to undertake.

And so unusual is the undertaking—so outstanding the circumstances involved—and so far-reaching will be the effect—that this episode will be recorded as an epoch in the history of western Canada.

The spirit of these men, I believe, is the essence of the same spirit that has made the Monkman Pass Highway a reality. It is the spirit of the man who, when he is sick to death, he is borne by his fellow natives, not toward home and loved ones, but ever onward toward his goal till death overtakes him.

That was the spirit that moved my sainted Quaker grandfather, who, stirred by the hatred between Indians and the whites, went as a self-sustaining missionary. In the remotest Indian village, he and his headless, or warnings from government officials, he loaded his wife and three babies behind an ox team and settled among the Kwakwaka'wakw Indians to bring them the message of peace and good will.

Possessed of this spirit, Edison, with brain cells at white heat—oblivious of passing time and of the need of food and rest—ceased not his quest till the electric light was born.

Who of us have not at some time felt impelled to do certain things? It simply wasn't in you to evade the task, nor could you rest till it was finished. And it is so with the Monkman Pass Highway Association and those who are feeling that impelling force.

White tongues wagged "it can't be done," the human voice was "can't" and "reproduced."

"It can't be done" or "it isn't feasible" is trumpeted at every worthy project, but valiantly inspired souls press on and the goal is a win to the shame of the opposers and to the glory of the victors.

Just how much is the Peace River Outlet worth to you? Is it worth a \$10,000, \$500, \$10 or \$1? Is it worth a month's work, a week's work, or a day's? Is it worth a car of wheat, a couple of fat steers, a hog or a hen? He who joins the SELF-HELP band will feel with them the thrill of achievement.

A thrill! We spend dollars to see a show, or a game, or a rodeo—all for a thrill, a thrill that is transitory. Who would not spend as much of money as he could on a thrill that will last? The thrill that will give the greatest thrill—a thrill that will not be transitory, but abiding and abiding?

Not the weakest but he who is in the race and wins knows the joy of victory. But only one wins in a foot race. All, however, who win who enter the Monkman Pass game, and all will have a share in the home-land.

If for no other reason than to encourage and strengthen the SELF-HELP spirit everyone should lend a hand. But the benefit which will accrue to individuals, to this inland realm of the North, and to the Dominion as a whole, is incalculable.

We all must know that when they reach their goal a thing will have been started that no power can stop—indeed even now it will not be stopped.

ALL HAIL TO THE SELF-HELP GANG!!!

## BANK OF MONTREAL CROP REPORT, No. 10

MONTREAL, Aug. 12.—The tenth crop report of the bank of Montreal for this season follows:

### General

Grain cutting is now general throughout the Prairie Provinces and the harvest is well advanced. Wheat threshing is well advanced in some districts. In Alberta general harvest, except in the Peace River District, have harvested the average crop of pastures, but are too late to affect materially the main crops and returns will vary widely in the different parts of the province. In those portions of Saskatchewan where a crop well harvested crops, the main staple, that the yields will be low. In Manitoba, the harvest is well advanced, but is not so favorable, although the yield has lowered the yield and grade of wheat in some districts. The outlook for the future prospects generally remain satisfactory. Under favorable weather conditions, the harvest of the main staple of the crops as a whole continues very satisfactory. In the Maritime Provinces, the harvest is well advanced, but is not so favorable, although the yield has lowered the yield and grade of wheat in some districts. The outlook for the future prospects generally remain satisfactory. Under favorable weather conditions, the harvest of the main staple of the crops as a whole continues very satisfactory. In the Maritime Provinces, the harvest is well advanced, but is not so favorable, although the yield has lowered the yield and grade of wheat in some districts. The outlook for the future prospects generally remain satisfactory. Under favorable weather conditions, the harvest of the main staple of the crops as a whole continues very satisfactory. In the Maritime Provinces, the harvest is well advanced, but is not so favorable, although the yield has lowered the yield and grade of wheat in some districts. The outlook for the future prospects generally remain satisfactory. Under favorable weather conditions, the harvest of the main staple of the crops as a whole continues very satisfactory. In the Maritime Provinces, the harvest is well advanced, but is not so favorable, although the yield has lowered the yield and grade of wheat in some districts. The outlook for the future prospects generally remain satisfactory. Under favorable weather conditions, the harvest of the main staple of the crops as a whole continues very satisfactory. In the Maritime Provinces, the harvest is well advanced, but is not so favorable, although the yield has lowered the yield and grade of wheat in some districts. The outlook for the future prospects generally remain satisfactory. Under favorable weather conditions, the harvest of the main staple of the crops as a whole continues very satisfactory. In the Maritime Provinces, the harvest is well advanced, but is not so favorable, although the yield has lowered the yield and grade of wheat in some districts. The outlook for the future prospects generally remain satisfactory. Under favorable weather conditions, the harvest of the main staple of the crops as a whole continues very satisfactory. ### FINDS MAJOR LEAGUERS ARE - SOMEWHAT BETTER THAN THE SEXSMITH BASEBALL TEAM

Mr. and Mrs. Wm. McNaughton arrived home by car from the Maritime, where they had been visiting their son, Ross, and his wife in New Brunswick. While down in that part of the Dominion they took a trip through the New England states, stopping off at Boston, and seeing a real game of ball between Boston and the Chicago Cubs. Bill says that both teams were somewhat better than the Sexsmith team.

On their return trip they came through Toronto and picked up Mrs. MacLennan, a sister of Mrs. McNaughton, and at Sexsmith took aboard Mr. J. McMahon, an uncle of Mr. McNaughton. This is Mr. McMahon's second trip, being here in 1925. In conversation with him he stated that he thought this a pretty nice country, but that old Ontario looked pretty good to him. Both the newcomers expect to be here a few weeks before returning home.

### MANY NEW BINDERS SOLD

In checking up the number of new binders sold this year we find that it has exceeded that of last year a few years. Up to last week there were 45 changed hands. This does not include some second-hand ones.

### LEAVES FOR THE EAST

Marshall Hight left by car for the East on Monday last, accompanied by his brother Ralph, who has been visiting here for the past few weeks. If things turn out as expected, Marshall intends to stay down there, and will send for Mrs. Hight and son later on.

### GIVE REPORT OF CONVENTION AT CANADIAN LEGION SMOKER

The Canadian Legion held a smoker in the Orange Hall on Friday last, where about thirty members were present.

Comrades J. McKenna and E. Carney had just returned from the Legion Convention at Lethbridge, and gave an outline of what happened there. Mr. McKenna is the representative of the Dominion Command for the Peace River country.

As the party started there was great anxiety amongst the members, as the refreshments had not arrived. After waiting for a while two scouts were dispatched to look up the absent member and to convey his back. After some time he was finally located and escorted back to the hall, amidst the cheers of those present.

### ROTHSCHILD EXPERIMENTAL FARM MAN SEXSMITH VISITOR

Mr. C. D. Morden, who is with the Experimental Farm at Rothschild, Sask., has been visiting with his uncle, Mr. Charles McGregor, for the past few days, and left on Tuesday's train for Invermay.

## BUFFALO LAKES

BUFFALO LAKES, Aug. 18.—Once again the blunders are ticking off their quota of blunders in the district, but the blunders that are going on this year are too short, too short. We've had some rain the last few days but we're thinking it's too late, although it helps pastures that had just about died out.

The frost of last week hurt many gardens in the district and some grain farther east and south.

The barn dance at Loma's was attended by many in the district and they all report a very good time, some better than others. We're wondering why.

Our aerial steam dock, Doc, is back with us again after helping for a week in C. L. Larson's new store at La Glace, which is a credit to that district. It would be a good idea to have a new one at Buffalo Lakes, Carl.

Joe Le Blond and family returned from their visit to the East and the States with a new Chevrolet. He reports the crops up here are the best yet.

Mr. Fred Duncan is now visiting his brother George.

SEEN AND HEARD

If it weren't for the farmer around would soon get his crop cut.

## THE NORTHERN TRIBUNE

He explained the infinite care required to produce clean seed and stated that it required five years to produce little seed.

delightful was Mr. Townley-Smith's address to the audience, which begged him to continue until the clock warned everyone that it was 7 p.m. and time to do housework. His good byes were said regretfully and many expressions of gratitude were extended to the Fawcett family for their most gracious hospitality, while all united in hoping that the Newman and his party would return again next year.

East of the Smoky

UNITED CHURCH, DE BOLT

The Rev. W. T. J. Jones of Sexsmith will be the special preacher in De Bolt on Sunday, August 22, at 7:30 p.m. This will be his second visit to De Bolt but the first time for him to occupy the pulpit and his visit amongst us is sure to be most successful. He is hoped the weather will be good for the service. Did you see him? He will be filled to give him a real East of the Smoky welcome. "Go friends, draw your seats and let us have a good Sunday evening, August 22, 7:30 p.m."

Our local minister, Mr. Hicks, took his brigade of boys to Starvation Lake for their week's outing. He will be assisted by his friend, Dick DeBolt. The week's outing will terminate on Sunday, when there will be a gathering of all the friends at the lake and Mr. Hicks will hold an open-air service.

Sunday school service and church service will be cancelled in the church in favor of the service at the lake.

We find the time slipping away and it's only a few more Sundays we will have Mr. Hicks amongst us, and it's quite a pity we could not have him the year round. He has never failed to draw good congregations and his sermons are much appreciated and the church is in a most healthy state.

Mr. Hicks contemplates putting on an evening's entertainment in the next near future. He has quite an assortment of pictures taken in the various fields where he has ministered and these with lanterns will be shown in the Community Hall and various other places. There will be a nominal charge for admission and the proceeds are to wipe off the debt on the church property.

Our minister's effort should meet with the utmost support and a full house is expected.

SAYINGS AND DOINGS EAST OF  
THE SMOKY

Mr. J. McKenna, our representative, took the time off to call on the secretary of the East of the Smoky Branch of the Legion, Mr. Alex. Walker of Calgary, was planning to visit all the outlying branches of the Legion in the fall and the zone representative is more than anxious that all branches should make an effort to inform all return men of his coming and come out and hear what he has to say.

Mr. Walker has been giving his time and all his efforts to the return men and their problems since his return from overseas and the record of his provincial presidency, his provincial election, held at the provincial president's house, recognized him and elected him provincial president. Quite recently he headed a delegation to interview the Premier, Hon. William A. Brown, relating to return men and their disabilities from the government service. It is reported the Premier gave the problem and his solution a very cordial welcome and appreciated what the Legion had done for the return men and asked the provincial president that it was not the intention of his government to cost the return men but would make every case on its own merits and he also gave his promise that complaints of return men in the service of the government would receive his personal consideration.

Mr. Walker made a most impressive speech through the proper channel, i.e. the British Empire Service League.

Mr. Walker pointed out to the Premier that he was interested in the men who are members of the Legion and many of them are unemployed. They were doing their best to keep their dues paid up. These dues are used to help their interest both provincially and federally. Mr. Walker speaks very highly of the Premier and his appreciation of the return men in the service of the government.

It is quite possible the provincial president will visit the East of the Smoky Branch about October and will be in the district in the near future and the meeting will take place in the Legion club-house. It is expected the meeting will be able to invite the wives and a banquet will be held following Mr. Walker's talk.

There are many matters of interest and the meeting is being arranged for all return men, members of the Legion and non-members. They are asked to keep this meeting in mind and give our provincial president a real welcome amongst us and hear what he has to say on legislation and other matters of interest.

God Save the King.

MANY FOREST FIRES

The local fire ranger, Mr. F. T. Stevenson, is having a real busy time for fires seem to have broken out all over the country. One of some note has been raging in the timber east and north of De Bolt and about twenty-five men have been working night and day to try and keep it in check. It is hoped the recent rain will have helped them in their efforts.

A REAL FISH STORY

Lily Olson was fishing in Harper Creek, accompanied by her younger brother, Albert Walker. Lily thought, rather than know she was in for a busy time and devoted herself of her coat. She was having much success and finally found her line being drawn down stream, but she held on and gave her a flip and landed a fair-sized fish in the back of her brother. Thinking the fish would jump back into the water, there he came out of it and sat on fish and coat until the fish gave its last gasp.

C. G. I. T. GIRLS' GUIDE

Mr. Thomas Moore thought that something should be done to organize the young ladies of the district, and

## Close to 100 . . .

(Continued from Page One)

The Institute in the northern part of the province are working to make a provincial objective and the suggestion made by Mrs. W. B. Roberts in her address. Having recently attended a conference in the British Columbia government with the total lack of assistance given Institutes in Alberta.

Reports of standing committees were given by Mrs. Morris, the Grande Prairie, Canada, Industries, Mrs. Haydon, Millarville, Canada, Industries, Mrs. Patterson, Grande Prairie, Education and Better Schools, Mrs. Weidner, Hinton, Hintonville.

A paper on "Canned Foods" was read by Mrs. Kowalsky, Grande Prairie, and much enjoyed.

With a specially drawn map, Mrs. Stewart in her own paper, "Infinite Way," led her hearers through the conferences in District 5 which she had attended. By train, by bus, and by car she travelled most of the way.

During the afternoon Mrs. Rens and Mrs. Smith of Hintonville presented two beautiful "new" plans. Mrs. Olive Kowalsky's plan was a "new" plan, and Mrs. Smith's plan was a "new" plan.

A novel feature was the door prize, a beautiful basket donated by the Grande Prairie Flour Mills, and which was won by Mrs. A. Hille of Hintonville. A sack of flour from the same company was awarded to Mrs. T. Johnson, Hintonville, for handcraft exhibit.

Many beautiful and pure pieces of work were seen in the Handicraft Exhibit.

At the invitation of the Sixth Unit Institute, the next conference will be held at that place, the date to be decided later.

The ladies of the Hintonville Institute served a delicious lunch at noon, and before the ladies left in the afternoon tea was served.

Text of Premier . . .

(Continued from Page One)

cooperate with Albertans and merely take from those who won't cooperate the rights which they themselves seek to usurp or assist others to usurp.

"The suffering and hardship of our people compels prompt and determined action to relieve the results demanded by them. No sound reason could be offered to justify delay in implementing the measures expressed will of the people. This necessitates their control of the policy of all connected with banking, credit and retention by them of their undoubted full property and civil rights within provincial borders.

"We submit our legislation does not transgress the rights and privileges of other provinces to look after the welfare of their people nor does it interfere with the present business of banking.

"This government unanimously and wholeheartedly upholds confederation and would deeply regret the results if tension among a debt-ridden people were increased by the faintest suspicion that federal government would side with plutocratic bankers alien to provincial interests against democratic Albertans earnestly seeking their economic freedom.

"Widespread opinion holds that Dominion financial credit will be impaired if you do not take action to constitute threats to the stability of Canada, who know that bankers alone possess the power to effect it.

"All members of this government are fully cognizant of the fact that the financial system of Canada is in a state of universal recognition as falling to the Dominion and to buttress this constitutional position of this section in the courts except, I gather from your telegram, after acceptance of the illegal infringement. That a reference to the Supreme Court of Canada, coupled with an agreement by your government to refrain from action pending the decision, would have met the immediate case. But agreement to suspend action not being reached, a similar reference to the courts would not be enough to avoid confusion and disturbance. We have therefore, with full consideration, found no alternative but to exercise the responsible duty laid

down upon us by disallowing the acts in question. I am sending you a copy of recommendation made to Governor General in Council by the Minister of Justice and duly approved today.

"I wish in conclusion to express the entire willingness of government of Canada to consult with your government as to any measures which may be found practicable and effective in solving the problems which beset Canada in common with other countries. We recognize the difficulties which face the people of Alberta and of other sections of Canada as the result of the prolonged depression. These difficulties we have been endeavoring to take part in solving. They can, we believe, be solved by orderly process without violation of the clear provisions of the constitution as it stands at present or as it may be amended, from which both federal and provincial authorities derive their powers. We believe, moreover, they can be solved without violation of the free recourse to the courts which is essential to the maintenance of our democratic institutions. We are determined to maintain the hard-won rights and liberties of individual citizens.

"W. L. MACKENZIE KING."

HONG KONG IS IN GRIP OF CHOLERA EPIDEMIC

HONG KONG, Aug. 19.—This British colony was gripped by a cholera epidemic Thursday. The disease has been reported daily, with 50 per cent of them ending in death.

PREMIER ABERHART SAYS THE PERSONNEL OF ROYAL COMMISSION IS "BIASED"

EDMONTON, Aug. 18.—Holding that the personnel of the royal commission announced by the Dominion government to inquire into "Democracy in Canada" is "biased," Premier ABERHART today expressed his views for the most part in "direct conflict" with the policies of the Alberta government.

Claiming that the personnel of the commission means that its recommendations will be "biased" in favor of the federal government, the Premier declared that the recommendations, "if adopted, would inevitably mean tearing up the B.N.A. Act and substituting for it a charter drafted in the interests of finance."

Prime Minister . . .

direct concern to every citizen." The truth of that statement is, I think, beyond question. The system of banking and currency established by law in any country is a matter of public concern to every citizen of that country and to the parliament elected to carry out their will in the case of Canada it is a matter of concern to every citizen of the whole Dominion who are concerned, and the federal parliament which is entrusted with the regulating and controlling the system of banking and currency in Canada.

"The Bank of Canada Act parliament has accepted the principle of public control of the currency and the Bank of Canada, not chartered banks, to control and regulate the currency of credit and currency in Canada and the chartered banks carry out the ordinary business of banking within the framework of control and regulation established thereby and under other Dominion legislation in regard to banking.

"We cannot accept any attempt to involve the issue involved by reference to financial tyranny or plutocratic domination. The government of Canada has no sympathy with any form of tyranny, whether exercised by bankers or by any other class, and would deeply regret the results if tension among a debt-ridden people were increased by the faintest suspicion that federal government would side with plutocratic bankers alien to provincial interests against democratic Albertans earnestly seeking their economic freedom.

"Widespread opinion holds that Dominion financial credit will be impaired if you do not take action to constitute threats to the stability of Canada, who know that bankers alone possess the power to effect it.

## At the 19th Hole

By George Duncan

Through the help of members of the Richmond Golf and Country Club, the annual Amateur Championship Tournament, held on the Calgary Golf and Country Club course August 12 to 17, and by the way, it was my first trip to the bright lights in twelve years, also my first experience in championship golf.

In order to get in a few rounds on the course before the tournament commenced, I boarded the train on Friday, August 6, after receiving the well-wishes of fellow golfers, who hoped I would make a good showing and enter the championship fight.

Arriving in Calgary 6:30 a.m. Sunday, August 8, I registered at the York Hotel and immediately got in touch with Mr. George Albert, representative for several fire and life insurance companies, who is a member of the Calgary Golf Club.

Before I left the Grande Prairie, D. W. Pratt wired Mr. Burns that I was entering the tournament and expected to be in Calgary on Sunday, and Mr. Burns gave me a letter of introduction to Mr. F. H. Brown, credit manager of Motor Car Supply Company.

After getting in touch with Mr. Burns, he arranged for a game Sunday afternoon on the course where I was to play on Monday before entries were allowed the privilege of the course on Monday.

The course was in splendid condition and I was better acquainted with the course than I was when I last played there. After the first round I had a good idea of the lay of the course and the conditions of the course.

Monday morning I called on A. E. J. Macdonald, formerly with Canadian National Bank, who is now in the crop commission in North America. He was much interested in the crop commission and the conditions of the course.

## China Will Defeat Japs In Long Run Is The Opinion Of Grande Prairie Chinese

They Point Out That China Is Now United And Prepared To Drive The Japs Out Of Chinese Territory

Grande Prairie, Aug. 19.—The opinion of the Chinese of Grande Prairie, as expressed in The Tribune reporter, is that it is this opinion that they are willing to back the country of their birth with their last dollar.

They point out that China has plenty of men willing to defend their country if given equipment, and they are willing to stand with the arms of the realm to arm Chinese soldiers.

They further say that China is now united, the first time in the history of the nation, and the people are now prepared to drive the Japs out of China's territory.

It may take a long time, but China will win, was the way a prominent local Chinese man saw the situation in the Far East.

The Tribune reporter was pleased that the Chinese already have plenty of arms and other equipment and that they are now united in the struggle for the last number of years.

Local Chinese are naturally elated over the success of the Chinese troops in defending Shanghai.

It was further pointed out that at least a million dollars, if necessary, will be donated by the Chinese of the United States and Canada.

W. H. G. Sinclair, representing steel works, is a visitor at Grande Prairie on his fall trip. He reports good business.

Grande Prairie Grain Prices

Grande Prairie, Aug. 19.—The Japanese Admiralty, alleged by a tiny Chinese motorship "provocative" torpedo attack on the Japanese ship, the old cruiser in the Whangpoo River last Monday, gave serious thought today of destroying the entire Chinese navy.
